Corelina98@gmail.com 73, Wewala, Horana

I am a motivated and dedicated undergraduate in Software Engineering with a good foundation in programming, problem-solving, and software development principles. Eager to apply academic knowledge and technical skills in practical environments, while continuously learning and contributing to innovative projects.

SKILLS

Technical -

- Languages - Java, Python, PHP
- Web - HTML5, CSS, JavaScript, MySQL
- MERN - MongoDB, Express, React, Node
- Tools - VS Code, Postman, Figma
- Frameworks - CodeIgniter, Pandas
- Concepts - OOP, Data Structures, SDLC
- AI/ML - Data Science Basics

Soft Skills -

- Teamwork - Works well across teams
- Work Ethic - Meets deadlines, high quality
- Adaptability - Learns quickly
- Attention to Detail - Accurate & consistent
- Creativity - Innovative thinking
- Other - Advanced Excel, MS Word

PROJECTS

August 2025 -Jan 2026

SMART O/L ICT GAMIFIED LEARNING PLATFORM (UNIVERSITY GROUP PROJECT)

- Designed a gamified platform for students who are studying for O/L ICT with quizzes, leaderboards, and progress tracking.
- Implemented user roles, MCQ quizzes, and interactive lessons. This project was made to motivate O/L ICT students.

JUNE 2025

INTELLIGENT TRAFFIC SIGNAL CONTROL SYSTEM (stimulation) (UNIVERSITY PROJECT)

- This project is done using Python.
- Modeled intersections and adaptive traffic light control using custom data structures.
- I also applied graph algorithms for vehicle routing and prioritization.

June 2025

ONLINE PERMIT APPROVAL SYSTEM -ePermit (UNIVERSITY PROJECT)

- This project is a developed web-based system to simplify the permit approval process under the domain of Politics and Governance.
- I made the complete SRS document, which includes case diagrams, functional & non-functional requirements, and UI mockups.

June 2025

BANK ACCOUNT MANAGEMENT SYSTEM -Python command-line app (UNIVERSITY PROJECT)

- This project contains the analysis and a Python command-line App that simulates a basic bank account management system.
- It provides a simple text-based menu for users to interact with the system.
- This command-line application, built with Python, simulates a basic bank account management system.

October 2025

MINDFUL UX DESIGN-GN QuickCheck (UNIVERSITY GROUP PROJECT)

- This project is a Mindful Digital Platform for Checking Grama Niladhari Availability and Required Documentation.
- In this project, we designed a digital platform prototype to check Grama Niladhari availability and also conducted UX research and collaborated with team members to improve usability.

December 2025

HOSPITAL MANAGEMENT SYSTEM -DBMS Mini Project (UNIVERSITY PROJECT)

- This project designed and implemented a relational database system using SQL, including schema design, data insertion, and querying.
- Also it used XML for structured data storage and applied data modeling principles to ensure data integrity and efficient management.

EDUCATION

- Bachelor of Engineering in Software Engineering (Ongoing) Year:2023/24 – Present
  [Open University], [Nawala]
- D-tec (Information & Communication Technology Course) program at SLTCA Year:2023
  [Zeon Opera], [Horana]
- G.C.E Advanced Level (A/L) – Mathematics Stream [Sripalee College], [Horana] Year:2020/21
- G.C.E Advanced Level (A/L) – Engineering Technology Stream [Private] Year:2022/23
- G.C.E Ordinary Level (O/L) – [Sripalee College], [Horana] Year:2017
