G.D. LINALI MADHUMINI

Software Engineering Intern

+94 75 585 2082 | Corelina98@gmail.com | Horana, Sri Lanka | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Motivated and dedicated Software Engineering undergraduate with a strong foundation in programming, problem-solving, software development principles, web technologies, databases, and software engineering practices. Eager to apply academic knowledge and technical skills in practical environments while continuously learning and contributing to innovative software projects.

TECHNICAL SKILLS

- Programming Languages: Java, Python, PHP, JavaScript
- Web Technologies: HTML5, CSS, JavaScript
- MERN Stack: MongoDB, Express.js, React, Node.js
- Databases: MySQL
- Frameworks & Libraries: CodeIgniter, Pandas
- Tools: Visual Studio Code, Postman, Figma, Git, GitHub
- Software Engineering: Object-Oriented Programming (OOP), Data Structures, SDLC
- AI / ML: Data Science Basics
- Other: Advanced Excel, Microsoft Word
- Soft Skills: Teamwork, Work Ethic, Adaptability, Attention to Detail, Creativity, Time Management

PROJECT EXPERIENCE

AI-Powered Digital Assistant for Grama Niladhari Services - GNQuickDocs

Group Project | August 2026

- Developed a web-based platform using the MERN stack to centralize Sri Lankan Grama Niladhari (GN) service information, required documents, and service procedures.
- Integrated an AI-powered assistant and multilingual support (Sinhala, Tamil, and English) to improve accessibility to government service information.
- Implemented secure user authentication, document management, and GN division information features using React, Node.js, Express.js, and MongoDB.

SMART O/L ICT GAMIFIED LEARNING PLATFORM

Group Project | August 2025 – January 2026

- Designed a gamified learning platform for students preparing for G.C.E. O/L ICT.
- Implemented user roles, MCQ quizzes, interactive lessons, leaderboards, and progress tracking.
- Focused on improving student engagement and motivation through gamified learning features.

INTELLIGENT TRAFFIC SIGNAL CONTROL SYSTEM (SIMULATION)

| June 2025

- Developed a Python-based simulation for intersections and adaptive traffic signal control.
- Modeled intersections and traffic-light operations using custom data structures.
- Applied graph algorithms for vehicle routing and prioritization.

ONLINE PERMIT APPROVAL SYSTEM – ePermit

| June 2025

- Developed a web-based system concept to simplify the permit approval process.
- Prepared the complete Software Requirements Specification (SRS), including use-case diagrams, functional and non-functional requirements, and UI mockups.

BANK ACCOUNT MANAGEMENT SYSTEM

Python Command-Line Application | 2025

- Analyzed and developed a Python command-line application simulating basic bank account management.
- Implemented a text-based menu for user interaction and account-management operations.

MINDFUL UX DESIGN – GN QuickCheck

Group Project | 2025

- Designed a digital platform prototype for checking Grama Niladhari availability and required documentation.
- Conducted UX research and collaborated with team members to improve usability.

HOSPITAL MANAGEMENT SYSTEM

DBMS Mini Project | 2025

- Designed and implemented a relational database system using SQL.

Worked on schema design, data insertion, querying, XML-based structured data storage, and data modeling for data integrity and efficient management.

EDUCATION

Bachelor of Engineering in Software Engineering (Ongoing) **Open University of Sri Lanka, Nawala | 2023/24 – Present**

D-Tec – Information & Communication Technology Course

SLTCA, Zeon Opera, Horana | 2023

G.C.E. Advanced Level – Mathematics Stream

Sripalee College, Horana | 2020/21

G.C.E. Advanced Level – Engineering Technology Stream

Private | 2022/23

G.C.E. Ordinary Level

Sripalee College, Horana | 2017
